

# Optimizing Dental Workflows: DHC PC vs. Off-The-Shelf in Dental CAD/CAM

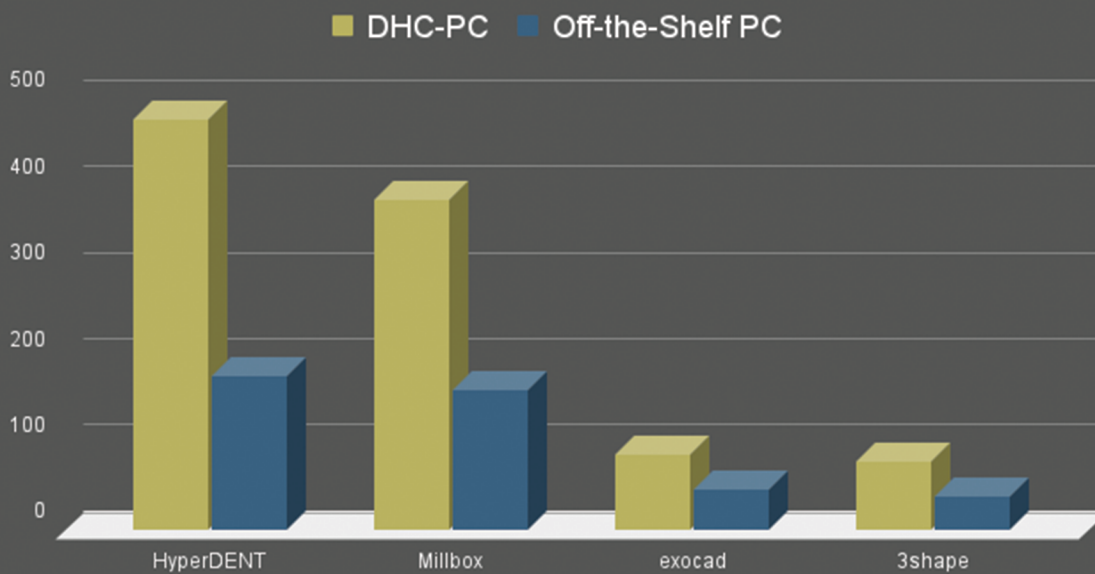

In the world of CAD/CAM, speed matters. Our recent comparison reveals DHC PCs consistently outperform off-the-shelf computers in crucial tasks. These findings, based on an 8-hour workday, emphasize the efficiency gains of DHC PCs, positioning them as the recommended hardware choice for the dental industry. Experience precision and speed with DHC, your ally in dental technology.

## Single Unit Calculation & Design Times

It's important to highlight that the provided calculations do not consider nesting time for CAM software. Additionally, for the case design times, it's set by a well-experienced CDT CAD designer. The data offers a preliminary insight into the potential productivity advantages of a DHC Signature PC over an off-the-shelf PC with comparable specs.
